**Person responsible for health and safety management:**

Peter Morley (Managing Director)

**Details of training provided for the Managing Director:**

Mr Morley has over 50 years experience in the design and construction of foundations and underpinning schemes. Mr Morley has reviewed the risks associated with the business and engaged consultants to advise him on many aspects of business, including health and safety management. To date Mr Morley has not undergone formal health and safety training.

**Details of Designers qualifications:**

Senior Engineer, Raymond Banks, has over 40 years' experience in construction, 25 of which are in the underpinning and foundation failure market. Fully accredited member of the Institution of Civil Engineers, reg no. 43357254.

**Persons responsible for site health and safety:**

Darren Bryan (Contracts Director)

Mr Bryan has over 30 years' experience in the construction industry and has gained the Nebosh level 3 certificate in construction health and safety. He is also a qualified trainer for the safe handling, storage, mounting and use of abrasive wheels. He is a holder of a gold supervisor CSCS card.

Paul West (Works manager)

Mr West has over 30 years of experience in the construction industry. He has attended numerous site health and safety inductions, he carries out tool box talks for all site based employees on a regular basis. He is a holder of a gold supervisor CSCS card, EFAW certificate, SSSTS certificate, NVQ's in underpinning and piling and a first aider.

Site foremen are responsible for all aspects of supervision on site. These foremen have been selected because of their experience on construction sites and their ability to manage their team of workers to ensure a quality end product that is constructed in a safe manner. All foremen and hold a gold supervisor CSCS card, are trained first aiders and have NVQ's in underpinning and piling operations.

**Insurance:**

Copies of our employers' liability and public liability insurances are available from our website.

**Details of formal notices and legal proceedings by the HSE in the last three years:**

We have had no formal notice or legal proceedings by the HSE since the start of business in 1990

**Details of any accidents/incidents/diseases reported in the last three years:**

12<sup>th</sup> December 2013 One none reportable incident involving a person working on site.

- The accident took place at a domestic property in Sutton, Surrey.
- This person sustained soft tissue bruising and swelling to index finger
- Finger was trapped in access door to hired in plant
- The person required attended hospital as an out patient
- The accident was not caused by any hazards resulting from Morcon Foundations Limited works being unsafe, however we have informed hire company of the incident with a view to better signage on hired machinery..

1 October 2012 One reportable accident involving a person working on site.

- The accident took place at Cleckheaton in West Yorkshire.
- This person sustained strained muscles to his left ankle due to slipping on mud

- The person required hospital treatment as an out patient
- The accident was notified to the HSE by Morcon Foundations
- The accident was not caused by any hazards resulting from Morcon Foundations Limited works being unsafe, however we are now putting greater emphasis on awareness on slips and trips along with housekeeping.

**Resources:**

Morcon Foundations Limited is committed to providing resources to enable the business to function efficiently and effectively.

A health and safety consultant (Hurst Setter and Associates) is engaged to advise the business on its legal obligations and practical advice to put specific requirements in to practice. Resources have been put in to developing Morcon Foundations Health and Safety policy for the business to provide a specific framework for organising and arranging health and safety.

Resources will be made available to enable the requirements of the Morcon Foundations Limited health and safety policy to be met. These resources will include:

- Ensuring experienced and trained personnel
- Provision of personal and respiratory protective equipment
- Tools, plant and equipment suitable for specific tasks and maintained
- The provision of suitable access equipment
- Vehicles that are safe, reliable and maintained
- Telecommunications for all persons in a supervisory role
- The development of safe systems of work
- Health and safety inspections
- First aid arrangements
- etc
